FALL SEMESTER 2017~2018

MAT2002 – Applications of Differential and Difference Equations

L23+L24 Slot

Lab Experiment Wise Questions

Instructions:

- (i). Format the E-Record as mentioned in the prescribed format uploaded in V-Top Course Page Menu and mention the Register Number, Name, Slot Details, Course Code and Course Title in the first page of the document. Also mention the Register Number and Name in every page of the document.
 - (ii). Submit the soft copy of E-Record for all the following questions as a single PDF document into V-Top Login properly.
-

Experiment No. – 10

Applications of Differential and Difference Equations MATLAB Lab

1. Write the MATLAB code for finding the partial fraction expansion of $H(z)$ by using MATLAB's built-in function *residue* $z(num, den)$ where $H(z) = \frac{18z^3}{18z^3 + 3z^2 - 4z - 1}$.
2. Using the built-in MATLAB function *filter* find the $z - transform$ by power series/long division method for the transfer function $H(z) = \frac{1 + 2z^{-1}}{1 + 0.4z^{-1} - 0.12z^{-2}}$.
